

WHAT MAKES US DIFFERENT?

Standards of Care. We adhere to the same high standards as human hospitals and hire only licensed veterinary technicians to perform procedures on your pets. Our hospital maintains sterile environments for all surgical procedures and carefully monitors and documents your pet's vital signs during procedures requiring anesthesia. Since your pet cannot tell you his or her pain level, pain management is an integral part of every surgery and dental procedure done at Animal Medical Center.

World Class Staff. We have one of the most rigorous talent acquisition processes in the nation. Our process for attracting screening and testing job applicants ensures that all our staff members meet the vision, integrity and commitment required of our profession. We love pets and people, too!

Compassion. Every one at Animal Medical Center has made a commitment to serve a very special profession; one that ensures the quality of life for all animals and the people who love them. Every member of our staff has a passion for animals and is invested in being a part of one of Michigan's premiere animal hospitals. We consider our profession a calling and understand the unique nature of the bond you have with your special companion.

WHAT DO WE VALUE?

We value *quality medicine and collaborative relationships*. To that end, we work with our clients to deliver individual health plans tailored to your pets' needs, breed, species and age. Your pets' well-being depends upon our ability to work together with continuity over his or her lifetime. Our hospital offers a full-range of medical, boarding and grooming services, which allows us to establish a lifetime relationship with them.

We foster an environment of *achievement and teamwork* by attracting top graduates, encouraging continuing education and providing experienced professionals with a work environment based on quality results. Our team of licensed technicians and doctors work together collaboratively to devise the best possible treatment for your pet.

Advanced technology supports our practitioners. Advances in veterinary medicine in recent years have been rapid – we pride ourselves in being actively invested in new technology and engaged in national conferences, clinical studies, professional internships and current Michigan State University Veterinary School resources and associations.

Animal Medical Center of Wyoming is proud to be one of only 12 percent of veterinary hospitals nationwide to meet the highly stringent accreditation requirements of the American Animal Hospital Association.

Comprehensive Compassionate Care

OUR COMPASSIONATE STAFF REALLY CARES

All the professionals at Animal Medical Center must meet extensive educational training and screening requirements to qualify to care for your pets. Our staff of licensed technicians and well-trained support staff have the knowledge and experience to deliver top quality care to all our patients. Everyone at Animal Medical Center is dedicating their professional life to improving the health and well-being of companion animals.

WE FOCUS ON HEALTH & WELLNESS

Twice annual Wellness Exams and annual Wellness Profiles, nutritional & behavioral consultations and dental care give your pet the best chance for a long and healthy life. Since they age seven years for every human year, your pets' visit to the veterinarian twice a year is important in catching potential problems before they start. An annual Wellness Profile gives your veterinarian a snapshot of all your pets' major body functions. Annual dental cleanings can add years to pets' lives. Vaccinating against common diseases protects all your furry family members from common diseases. And, preventing parasites and fleas ensures both your pet and your family won't have to worry about flea infestation and deadly parasites. We offer a wide range of preventatives for every lifestyle and budget.

INVESTMENT IN PEOPLE, PRACTICES & TECHNOLOGY

We invest every year in the latest technology including state-of-the-art dental equipment & digital radiology, ultra sound and monitoring equipment. We maintain the highest standards of practice in all areas: sterile surgical suites, patient monitoring and current vaccine protocols. We utilize diagnostic technology that includes digital imaging, ultrasound and a fully equipped in-house laboratory.

COLLABORATION & CONTINUITY OF CARE

The veterinarians at Animal Medical Center all graduated from a wide variety of the nations' finest veterinary schools. A range of approaches is explored through daily collaboration on medical cases to devise the best possible course of treatment. All our healthcare team members participate in delivering quality care and caring to your special family member every day. Ask us about our credentials – we don't often divulge our accomplishments, but we'd love to tell you! Our boarding & grooming departments will keep your pet safe & happy from puppy/kitten stages to supportive geriatric care.

A COMMITMENT TO CLIENT SERVICE, EDUCATION & EMPOWERMENT

Our belief is an informed client is a happy client, so we will give you all the information you need to participate in your pets' healthcare decisions. We hire support staff who are passionate about animals and who love serving our clients. Our goal is providing you with the best care, with convenient hours, efficient service and a pleasant experience. We want to establish a long-term, personal relationship with you and your pet, based on mutual respect and an understanding of how your pet fits into your family and lifestyle.
