

WE WANT YOU TO KNOW

Our Fees – It is our policy that payment for professional services is made at the time they are performed. We make every effort to ensure that all fees are fair and reasonable. We accept CareCredit (a national pet credit card), and can aid you in determining if you will qualify for their services.

Estimates – We are happy to provide you with a written estimate of any service to be performed. Please realize that it is sometimes difficult to anticipate an individual pet's treatment needs. If the actual costs are greater than the estimate, we will notify you for authorization.

*"Quality Traditional and Alternative
Medicine for Your Companions"*

The Bowman Animal Hospital Philosophy

We pledge to provide the highest quality medical and surgical care to our patients and the finest customer service to our clients.

Delivering Superior Veterinary Care

Our innovative approach to veterinary care spans the life of your companion, from puppy/kitten wellness exams to comprehensive senior screenings for older pets.

We recognize that pets are family, and we treasure and honor that bond. Our clients are friends as well as customers, and we value their continued trust and goodwill.

At our practice, our team members are the most important resources in our service commitment to our clients. By applying the principles of trust, honesty, respect, integrity and commitment, we nurture and maximize talent to the benefit of each individual and the practice.

From routine to advanced care, Bowman Animal Hospital is proud to offer the very best in veterinary medicine. Along with my outstanding team of veterinarians and staff, I welcome you to our practice and look forward to establishing a lasting relationship with you and your pets.

Sincerely,

Gale Bowman, DVM, MS

INDIVIDUALIZED HEALTH CARE PLANS

At Bowman Animal Hospital we believe that every pet deserves an individualized health care plan as unique as they are. It is our goal to educate and involve our clients in the development and implementation of this specialized plan. By offering both traditional and holistic medicine, pet parents are able to make the most informed decisions regarding the care of their special companions.

Boarding, Grooming, and much, much more!

COMMITMENT TO PARASITE CONTROL

Parasitic Zoonoses are diseases of animals that can be transmitted to people. The growing popularity of cats and dogs and the high rate of worm infections in our pets can result in a risk to people from exposure to infective eggs and larvae. We offer advanced parasite control to keep your pet and your family safe year-round.

WE UNDERSTAND HOW MUCH YOU CARE

PROGRESSIVE DENTAL CARE

The number one health problem diagnosed in cats and dogs over 4 years of age is periodontal disease. Dental disease puts stress on your pet's immune system and weakens the liver, kidneys and heart. We provide an extensive dental care program. Our clients have become aware of the importance of having their pets' teeth examined and cleaned on a regular basis. Preventive dental care can add years to the life of your pet.

Periodontal disease with thick tartar formation and painful gums

SENIOR WELLNESS

Pets age much faster than people; by age 7 many pets are entering their senior years. Because of this, we believe twice-a-year veterinary check-ups are essential for detecting major health problems that can occur quite rapidly. Our twice-a-year wellness exams can help diagnose, treat, or ideally prevent illness before your pet becomes symptomatic. They also provide an opportunity to discuss nutrition, behavior, and other concerns regarding your senior pet, so that they can live a longer, healthier, and happier life.

WEIGHT MANAGEMENT

Obesity among cats and dogs has reached epidemic proportions. Excess weight leads to serious health risks, including diabetes, heart disease, and arthritis.

Recent studies have shown that pets that maintain an ideal weight throughout their lives live an average of two years more than overweight pets. Our doctors and staff will create an individualized weight loss program for your pet, and are deeply committed to providing our support every step of the way. With frequent weight checks, adjustments, and health monitoring we can ensure that your pet successfully reaches his goal.

BEHAVIORAL COUNSELING

Unacceptable behavior is the number one reason pets are abandoned or euthanized in the United States. Behavioral changes are often the first sign of underlying health problems, and our veterinarians will evaluate your pet to see if there is a medical reason for these changes. If health problems are not the cause of bad behavior, our team is educated on the most recent diagnostic and therapeutic options for the successful management of behavioral problems. Our goal is to lower this statistic, and build a stronger and more rewarding bond between you and your pet.

INTEGRATIVE MEDICINE

Combining conventional medical treatment and alternative treatments, for which there is high-quality scientific evidence of their safety and effectiveness.

Acupuncture – Bowman Animal Hospital is proud to offer a variety of acupuncture treatments for your companions. Acupuncture is one of the safest and most effective treatments for pain relief, allergies, and central nervous system disorders. Many owners also include acupuncture to maintain their pet's optimum health.

Herbal & Homeopathic Therapies – Chinese and Indian herbal medicine are both focused on strengthening your pet's physiological defense systems. The premise is based on healing the whole body in order to correct imbalances within. Homeopathy is based on the principle of similars, assisting the body to become hyposensitized to a specific toxin.

Holistic Nutritional Counseling – "You are what you eat" is a very accurate statement. At Bowman Animal Hospital we believe strongly diet is instrumental in reversing many symptoms, as well as keeping pets well. Whether you are interested in home cooking or pre-made veterinary diets, our doctors will work with you to create an individualized feeding plan for your companion. We also offer an extensive line of non-synthetic whole food supplements.

Veterinary Orthopedic Manipulation (VOM) – VOM is similar to chiropractic care, but without all the pushing, popping, and cracking. It also has the added ability to restore neurological function to diseased organs and detect early stages of disease before the condition becomes irreversible.

Physical Therapy – Bowman Animal Hospital offers the services of a registered physical therapist working on a referral basis in conjunction with our doctors. If your dog is recovering from an illness, injury, or suffering from arthritis, effective rehabilitation can decrease pain and help your dog regain mobility.

PROFESSIONAL GROOMING

Our staff of professional groomers will brush, comb and trim your cat or dog in a style that is appropriate for its breed and your lifestyle. They will consult with you to determine a style that looks great, is comfortable for your pet and can easily be maintained at home. We provide special shampoos and rinses for dogs with allergies or other special skin conditions.

BOARDING: CATS, DOGS & EXOTICS

At Bowman Animal Hospital our mission is to provide loving care to all of our patients, including those receiving our Extended Care Services. We take pride in offering exceptional care and personal attention to all of our guests, including a daily individual assessment by a veterinarian. Our avian and exotic suite has large windows and is individually temperature controlled for the comfort of your pets. Don't hesitate to ask for a tour of our Extended Care Facilities.
